MEDIA RELEASE – FOR IMMEDIATE USE

Tuesday, December 9, 2019

CATIC RELEASES NEW SEARCH INTEGRATION PLATFORM

CATIC is pleased to announce the release of TOPS (Title Order Packaging System), its new search integration platform. This new system replaces the desktop application that was previously used by the company and its agents and title searchers.

The new platform has been deployed in Florida and parts of Connecticut and will soon be available in all of CATIC's offices that offer title services. The platform seamlessly integrates with PrepExpress Online[®], the company's web-based customized closing tool. We are working with other third-party software providers in order to ensure that TOPS will also integrate with those programs.

Agents and title searchers who use TOPS will have the ability to customize their order screen so that it reflects the information that they wish to view. They will be able to securely access search orders and instructions, invoices, back title information, and other supporting documentation with ease. The platform covers all of the tasks involved in the process, from the search order request to the input of the final product.

In announcing the release of TOPS, CATIC Vice President Michael Savenelli stated, "We are excited about this enhancement to the company's title services. The program will enable both our agents and searchers to perform their jobs more efficiently at no cost to them."
